

Better Stone

A New Era of Stone

Synterra: Synthetic Claystone

Synthetic claystone; such as Synterra by Better Stone, is a revolutionary zero silica option that combines the best features of other materials while addressing their limitations. Engineered from refined clay-based materials, polymer resins, pigments, and other decorative elements, synthetic claystone offers exceptional durability and ease of installation. It is designed to create flawless finishes, making it ideal for high-end kitchen benchtops and bathroom vanities.

Sensational Colours

We have collections to suit everyone; Standard, Deluxe, Premium and Outdoor! Our colours are subtle, bright, bold, clean and they are designed to last. Additionally, synthetic claystone is stain and scratch-resistant, non-porous, and easy to clean and maintain. Its performance on the Mohs hardness scale is 6.0+, ensuring it can withstand daily wear and tear.

Lifetime Warranty & Care

At Better Stone, your satisfaction is our priority. We proudly offer a lifetime warranty on indoor slabs and 25 years on outdoor slabs, giving you confidence in the lasting quality of our products. Our dedicated, Australia-based team is here to assist with any questions or support you may need. If we're unable to answer your call immediately, we'll be sure to return it within 24 hours. Whether it's product care, maintenance, or general enquiries, we're always happy to help.

0% SILICA , 100% BETTER

A New Era of Stone

Manufacturing Dream

Superior Joining: One of the standout features of synthetic claystone is its ability to allow for seamless lamination and precise mitred edges, eliminating common issues like dark glue lines and colour inconsistencies.

Experience vibrant colors that permeate the entire slab, guaranteeing stunning edge profiles.

Large Workable Slabs

Fabrication made easy with Synterra's revolutionary formula, along with its full-body performance, simplifies the fabrication process, enhancing worker safety and promoting environmental respect. A product that maintains all the superior quality of traditional quartz surfaces with less than 1% crystalline silica. 3.2m x 1.6m workable slabs; trimmed with straight edges, batch matched and bookmatched.

Outdoor Collection

Discover a revolutionary Collection of four Outdoor surfaces designed with a patented UV resin for UV stability. Expertly engineered to balance strength and practicality, this range provides a durable solution for elevating your outdoor space. These surfaces effortlessly harmonise with any architectural design, bringing a subtle yet striking sense of sophistication to your exterior, complete with a 25-year warranty.
