It couldn't be **Easier.**

Every step in the home building process has been broken down into individual tasks, so you can choose to do a little or do a lot.

Personalised workflow of easy step-by-step tasks

Build Buddy's intelligent algorithms generates a detailed workflow of tasks that guides you from design to construction.

- ✓ Tells you **WHAT** you need to do
- ✓ Says **WHEN** you need to do it
- ✓ Explains **HOW** to do it
- ✓ Connects you to the Pros **WHO** will do it for you

Quality Assurance Features

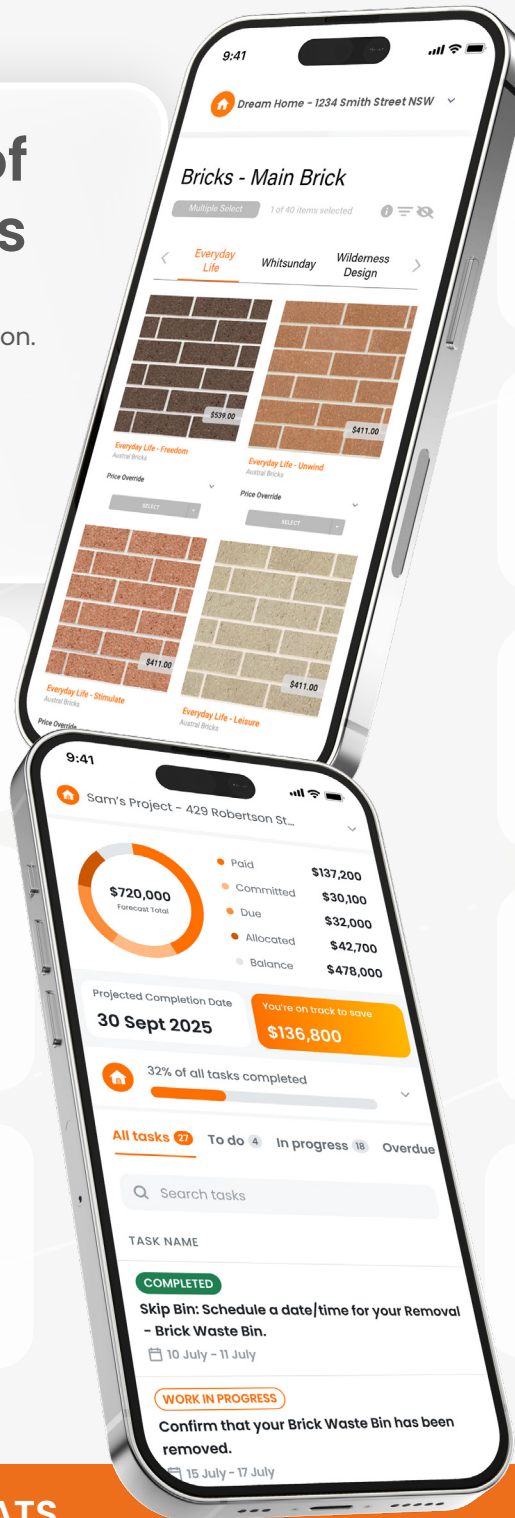

Each task is pre-populated with detailed descriptions, scope of works, instructions and quality assurance checklists, written by building experts and based on building industry best practices.

Simple Task Management

As you progress through your tasks, the status of each task will automatically update, ensuring it's very clear what it is that you need to action at any time. If you change the date of a task, it will automatically reschedule everything else. View your tasks in your preferred way - as a list, in a calendar, in a timeline, or in simplified tiles.

Budget vs Spend Tracker

Work with a professional Estimator from our Pro network to create a budget for your project. Once you decide to lock it in, you will start automatically tracking against your budget as you spend within each task. You can even add any additional purchases that you make off platform - it couldn't be easier to stay on budget!

Exclusive Closed Pro Marketplace

We believe that great trades build great homes. Having confidence and trust in the contractors and suppliers you work with is crucial to the success of any building project. We have curated a Pro database by invite-only where you can engage with some of the best in the industry, from designers and certifiers, to carpenters and electricians.

Wholesale Discount Prices

Save even more on your project with discounted materials and products from some of Australia's big name brands. Gain access to the same wholesale rates as the volume building companies, with thousands of quality products to choose from.

Secure Payment Gateway

Take control with your own digital wallet where you can link your existing bank accounts. You can choose to make direct immediate payments, or you can choose to allocate funds and schedule future payments, which always asks for your authorisation before release.

Automatic Contract Generation

Whenever engaging with a Pro, the platform will automatically generate a contract based on all your communication and project information. Should anything change, there is a variations management feature, and an easy-to-use defect management feature should anything go wrong.

Centralised Document Library

Keep all your project documents in one place with your own library. Designed specifically for home building projects, your documents are automatically shared as you engage with any Pros, and they are automatically notified should you update anything.

You are always **in control** but are **never alone**

Expert Guidance & Support Team

Building can be overwhelming at times, so we offer on-demand support to assist you every step of the way. Whether you have a technical issue or require specialised construction knowledge, our team is here to help.

Dedicated Construction Buddy™

Select your own Construction Buddy from our Pro marketplace – a real-life, local, experienced building professional to guide you through the entire construction phase of your project.

Choose how much on-site support you'll need, from safety and quality checks, to providing expert advice and recommendations, or even coordinating trades and contractors.

Invite Others to Your Project

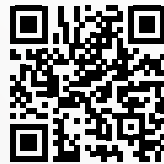

Whether you want your partner to actively manage the project with you, or you want a friend or family member to watch your journey, you can add as many people to your project as you wish.
