Eight reasons *why* Automation is #1

Easy. Installation does not require any rewiring of your home's current electrical.

Trusted. The biggest brand names on the market use Z-Wave in their smart home products.

Affordable. You can get started with a minimal investment and easily add more smart products.

Experienced. There are already 100 million products in smart homes worldwide.

Reliable. On the market for over ten years, our product has quality products that deliver reliable results. Otherwise we wouldn't recommend them!

Smart Home Leader. Is the clear leader in the home automation industry. Everyone in the know chooses Us.

Secure. Wave technology uses the same encryption as online banking which is why 9 out of 10 leading security companies choose it.

Spoilt For Choice. With over 2400 smart home automation products on the market, you have many choices to suit your needs - styles, price points,

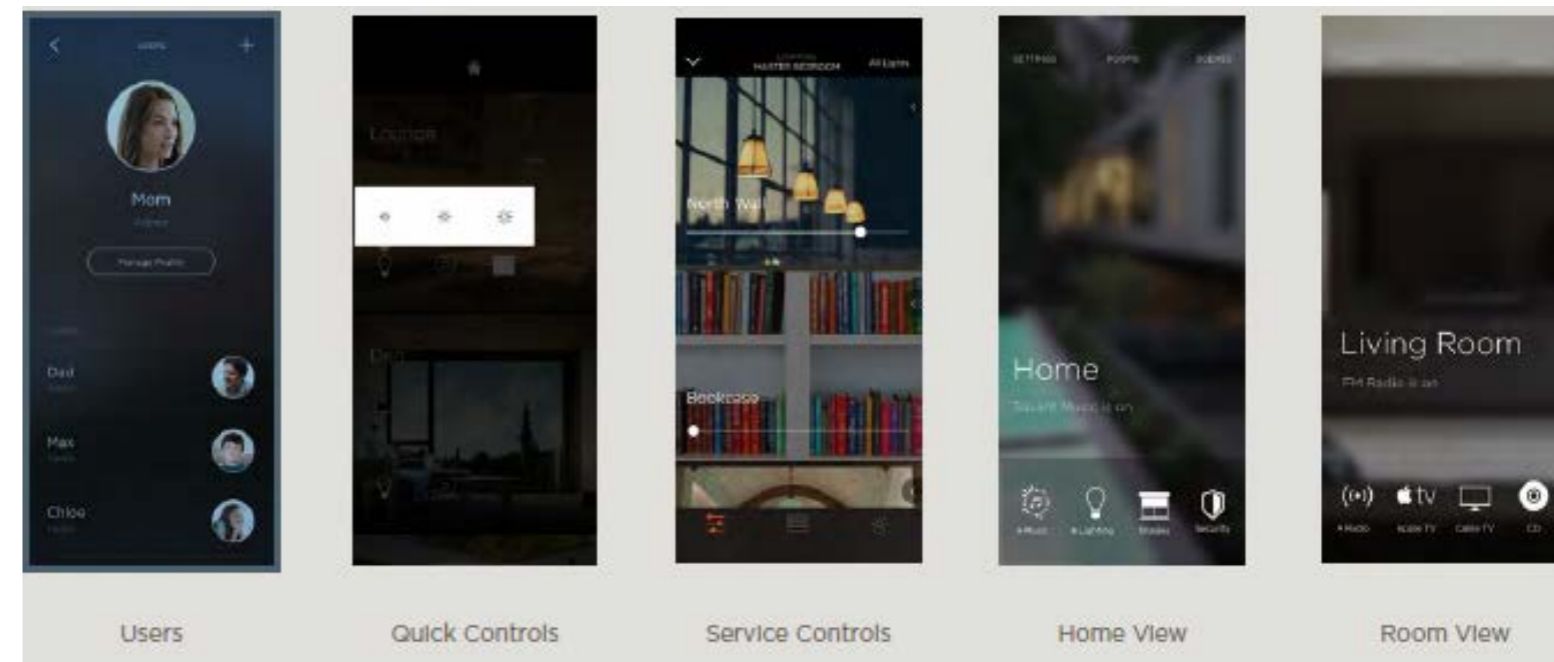

How does it work?

After the system is set up, you use a simple app that you download for free onto your phone, tablet or computer, to control appliances, devices, windows, doors and locks from anywhere in the world.

The App

The mobile app is the central control for your entire system, so even if a smart device has its own app, the mobile app will integrate it into the one, simple-to-use interface. It is free to download and runs on smartphones (iOS and Android), tablets, or in a browser on any Windows, Mac, Chromebook or Linux computer. It can operate devices both individually or as a group where required. Your system will continue running 24/7 to monitor your home, regardless of whether you have the app open.
