DOOR RAW MATERIALS

- WPC door is a combination of wood and plastic materials - PVC and natural wood pulp with added safety additives are extruded at high temperatures to form panels.
- A full range of raw materials for WPCdoors in large quantities:
Door panel 40mm thickness
Door Frames: 100/125/160/200/240mm
Architrace L-shaped 45*60mm
- Why us?
Three modern factories
10years+ experience
Factory price, production capacity, fast delivery...
- The largest extrusion plant in Central Vietnam, supplying billets not only to domestic factories but also exporting to Asian and Middle Eastern markets.

ACCpanel
Quality solutions for interior spaces

3 MAIN PRODUCTS

ACC Panel offers high-quality industrial wood products that meet international standards, perfect for both home interiors and large construction projects.

PVC BOARD

Commonly referred to as PVC sheet, is a thermoplastic material formed through the polymerization reaction of vinyl chloride.

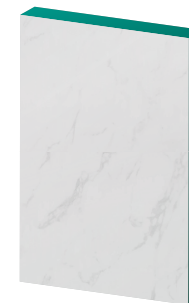

PLYWOOD

It is made from several layers of thin boards of the same size stacked on top of each other. These layers are glued together with EO standard glue that is safe for health.

MDF

There are 2 types of moisture resistance and non-moisture resistance covering various surfaces: T, EV, SH, G, PL, ZN, DW. Use adhesives that meet E2 emission standards.
