WELCOME TO DOUBLE GLAZING MASTERS

GOLD COAST SHOWROOM & DISPLAY CENTRE

6/9 Gateway Drive, Biggera Waters

Double Glazing Masters is your number one choice for replacing single glazed windows and doors across South East Queensland. We design, manufacture, supply and install **High Performance, Australian Made uPVC Double Glazed Windows & Doors** specifically engineered for our country's unique climate.

Our uPVC systems are sourced from **aluplast** — a world-leading German manufacturer — and paired with **ThermaAcousta** high-performance glass to deliver industry-leading thermal, acoustic and security performance.

OUR MISSION

"We're committed to delivering superior double glazing solutions that enhance comfort, energy efficiency and security for every home we touch — building lasting relationships one window at a time."

NOISE REDUCTION

WHY SWITCH TO UPVC DOUBLE GLAZING?

BUILT FOR AUSTRALIA'S UNIQUE CLIMATE

Single glazed windows simply cannot provide adequate thermal or energy efficiency for Australia's harsh conditions — nor do they offer sound insulation or security. uPVC double glazing solves all four problems in one investment.

Multi-chamber uPVC profile, cutaway

ENERGY EFFICIENCY

Our uPVC frames paired with ThermaAcousta glass create a superior thermal barrier — keeping your home cool in summer and warm in winter. Reduce your heating and cooling costs significantly year-round.

NOISE REDUCTION

Reduce unwanted external noise by **up to 70%**. Traffic, neighbours, aircraft — our high-performance glass units dramatically reduce what gets through, giving you a peaceful, quiet home environment.

ENHANCED SECURITY

uPVC double glazed units with multipoint locking systems are significantly harder to breach than standard single glazed windows and doors — giving you peace of mind 24 hours a day.

LOW MAINTENANCE

uPVC frames are durable, weather-resistant, and never need painting or re-sealing. A simple wipe-down is all that's required to keep them looking brand new for decades to come.

UPVC DOUBLE GLAZED WINDOWS

14 frame colours available — solids, greys & woodgrain finishes. See page 5 for the full range.

Every window in our range is double glazed as standard, with uPVC frames and ThermaAcousta high-performance glass. Custom sizes available. All windows come with multipoint locking and a full installation warranty.

TILT & TURN WINDOWS

European-engineered. Tilts inward for secure ventilation or swings fully open for easy cleaning. Ideal for bathrooms and upper levels.

FIXED WINDOWS

Non-opening for maximum light and views. Perfect as feature windows, highlight windows, or where ventilation isn't needed.

CASEMENT WINDOWS

Side-hinged for maximum ventilation and unobstructed views. Our most popular window style — perfectly suited to heritage and Hamptons-style homes.

SLIDING WINDOWS

Smooth horizontal operation. Space-efficient and easy to use. Ideal for bedrooms, living areas and spaces with limited clearance.

AWNING WINDOWS

Top-hinged, opens outward from the bottom. Ideal for ventilation even in wet weather. Perfect for kitchens, bathrooms and clerestory positions.

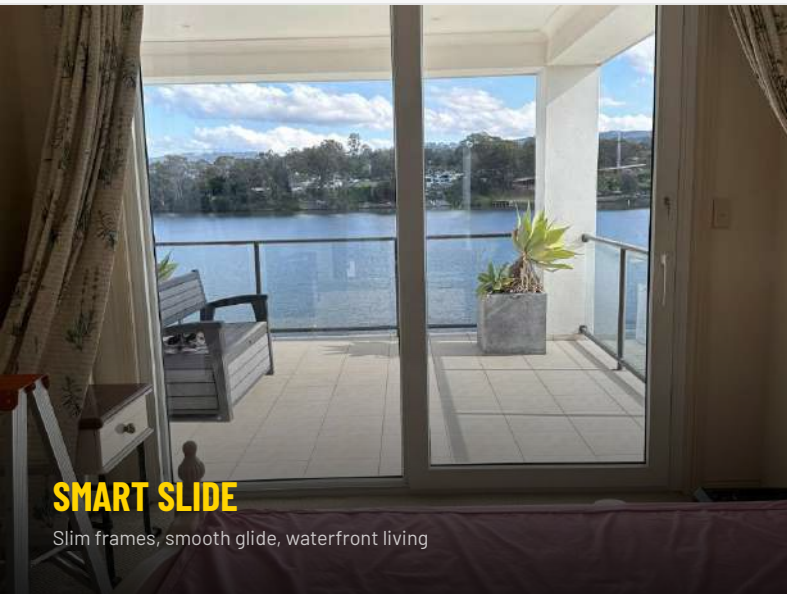

SHAPED & SPECIAL

Custom shapes — arches, triangles, bay and corner configurations. Bespoke solutions crafted for unique architectural features.

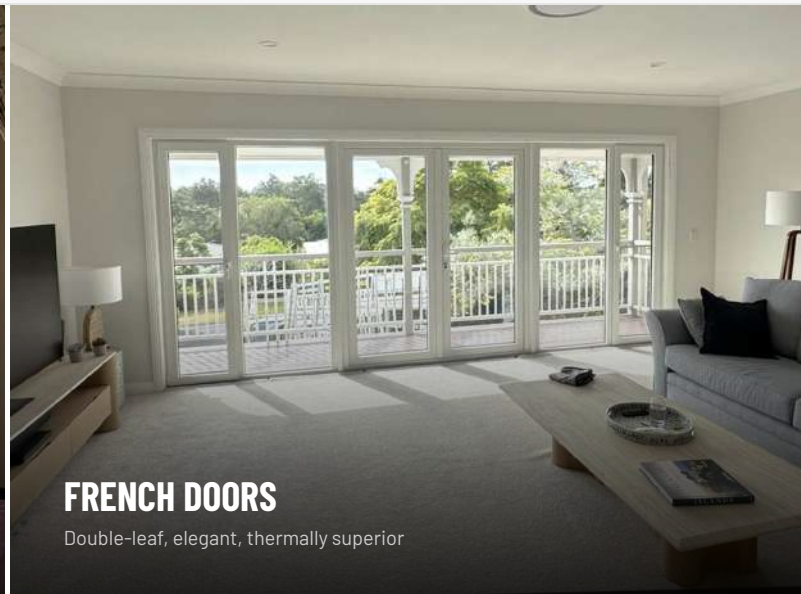

UPVC DOUBLE GLAZED DOORS

Stylish, thermally efficient and secure. Our uPVC door range complements our windows perfectly – the same exquisite quality, the same performance, the same Australian manufacturing.

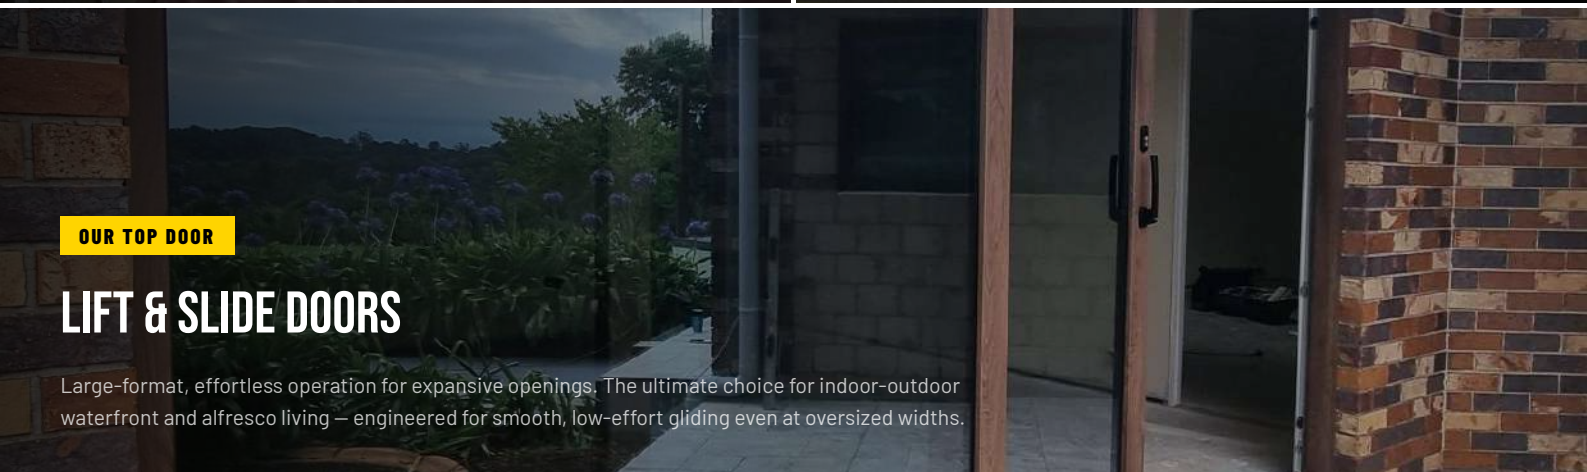

SMART SLIDE

Slim frames, smooth glide, waterfront living

FRENCH DOORS

Double-leaf, elegant, thermally superior

OUR TOP DOOR

LIFT & SLIDE DOORS

Large-format, effortless operation for expansive openings. The ultimate choice for indoor-outdoor waterfront and alfresco living – engineered for smooth, low-effort gliding even at oversized widths.

AVAILABLE FRAME COLOURS – 14 FINISHES

WOODGRAIN FINISHES

Swatches are a close approximation for reference only – please confirm exact finishes against physical samples in-showroom.

WHAT OUR CUSTOMERS SAY

4.8 ★
145 GOOGLE REVIEWS**Rainer Waldmann**

Gold Coast · 5 months ago

★★★★★

"Excellent and very professional company. From first contact to planning and execution. The tradies did a meticulous job, even cleaned the new build-in windows. We replaced **23 windows and 3 doors**. Great products, the house stays cool (even without AC running all the time) and it is very quiet now. We love the turn and tilt window style, knowing these from (cold) Europe. And a great view to the outside — no safety screens, no louvres, just awesome. Had friends over currently building a new house and they were convinced from the high quality windows and doors and chose DGM as their future supplier. Well done DGM team."

★★★★★

"Simply the best! I have lived in houses with double glazing since 1972. In 1982 whilst living in Germany I first came across Tilt and Turn. It is without doubt the most efficient system and is very flexible so that the glass combinations can be tailored to your needs. Erick and Danilo installed **23 windows and 4 doors in four days** and left everything spotlessly clean. The quality of all the components is excellent — I gather even the screws are imported from Germany. We have already experienced just how effective the windows are at eliminating noise, as a caterpillar bulldozer was operating about 50 metres away but once we closed the windows it could not be heard inside the house. Our thanks to everyone at Double Glazing Masters for a great product and a job well done."

★★★★★

"Very happy with our new front door, really keeps out traffic noise. The team are easy to deal with and professional, much easier to work with compared to other double glazing companies in Brisbane."

★★★★★

"We recently had double-glazed windows installed to tackle the constant traffic noise from a nearby bridge, and the transformation has been nothing short of extraordinary. The noise is gone — not reduced, not softened — **gone**. As a bonus, the new windows look fantastic from the outside, blending in far better than our original aluminium ones ever did. A special shout-out to Ralph in sales — easily one of the most knowledgeable and honest people we've dealt with in any industry. The manufacturing quality was equally impressive; the framing and finish are the best we've seen anywhere, and we're picky. This is a company that truly knows its product and values customer satisfaction above everything else. We couldn't be happier with the result — and our now blissfully quiet home."
