

INDOOR GAS FIREPLACES

FIRE BY **escea.**

# Born in the deep south, where warmth really matters.

Escea fireplaces are designed and made in the deep south of New Zealand, the best place to test the limits of heat and efficiency.

Inspired by our backyard and driven by our purpose – to put a better fireplace at the heart of every home.

MADE IN  
NEW ZEALAND

## FIREPLACE, ANY PLACE

Escea's flexible flues run up, down or even sideways, for complete design freedom.

## BEAUTIFUL WARMTH

Why compromise heat output for good looks? With an Escea fireplace you get the best of both worlds.

## CRAFTED WITH CARE

From concept to completion, our people take pride in every fireplace they have a hand in making.

# Features

## POWERED DIRECT VENT FLUE SYSTEM

Escea’s Powered Direct Vent Flue technology achieves greater efficiencies and allows flues up to 12m in length which can be run horizontally or vertically. Flues can finish on a roof, an outside wall and can even be run under a floor. It uses outside air for combustion rather than room air and is a completely sealed system unaffected by other appliances such as extractor fans. With no fumes coming in and no hot room air going out, you keep warmer and healthier.

This innovation also gives you the flexibility to put the fireplace wherever you like, without the need for cavities or even walls to install. Another benefit of the Power Flue is joinery-friendly Zero Clearance installations. The key is the fan-forced airflow which allows you to install the flues in any direction, making even the most complex flue run possible.

**Available on all indoor gas fireplaces.**

## ZERO CLEARANCE

Escea indoor gas fireplaces have a Zero Clearance rating, meaning they can be installed flush against combustible materials without the need for additional clearances. This allows for a clean, seamless finish where the glass front aligns with the wall.

This makes installation easier and gives you greater design flexibility—you can surround the fireplace with a wider range of materials, including timber or wallpaper, and integrate it directly into custom joinery. You can also safely hang a TV or artwork just 200mm\* above the fireplace.

*\*Excludes DL Series*

# Introducing Escea Electric Fireplaces.

Born out of the same passion and restless spirit that's been driving us for the last 20 years, we're proud to introduce our debut range of fully electric fireplaces.

Powered by innovative holographic technology and guided by a commitment to realism, our fireplaces capture the essence of traditional wood fire flames, with all the benefits of electric.

With complete installation flexibility, unlimited surround choice, effortless operation, and industry-leading heat output, Escea brings you a better way to experience electric.

## LE800

---

INBUILT HOLOGRAPHIC ELECTRIC FIREPLACE

LE800 with Double Display Niche

## LE800

With clean lines and a contemporary, minimalist design, this fireplace is ideal for those seeking the dramatic impact of flame with the ease of electric.

### FEATURES

#### Unmatched realism in every detail

Crafted to perfection with realism at its core, every element of this fireplace emulates the look, feel and ambience of a traditional wood fire.

#### Holographic Flame Technology

This innovative technology creates the illusion of burning flames and flying sparks coming from the lifelike fuelbed beneath.

#### Complete installation flexibility

No flues, vents or consent is required, providing complete installation flexibility for a seamless addition to your home.

#### Unlimited surround choice

With a Zero Clearance rating, choose any surround material you like and place your TV as close as possible.

#### Slimline touchscreen remote

Choose from three flame settings, adjust the temperature or use the ambience of flames without heat, all from Escea's latest touchscreen remote.

#### Accessories Collection

Make your fireplace the focal point with Escea's collection of optional accessories, specifically designed to complement the LE Series, see page 22.

For the most up-to-date product information and specifications, visit our website.

## LE1000

INBUILT HOLOGRAPHIC ELECTRIC FIREPLACE

LE1000 with Brow Fascia

## LE1000

With additional space either side of the flames, this extended linear fireplace gives you wider viewing angles, ideal for expansive walls and open-plan spaces where the fire becomes the focus.

### FEATURES

#### Unmatched realism in every detail

Crafted to perfection with realism at its core, every element of this fireplace emulates the look, feel and ambience of a traditional wood fire.

#### Holographic Flame Technology

This innovative technology creates the illusion of burning flames and flying sparks coming from the lifelike fuelbed beneath.

#### Complete installation flexibility

No flues, vents or consent is required, providing complete installation flexibility for a seamless addition to your home.

#### Unlimited surround choice

With a Zero Clearance rating, choose any surround material you like and place your TV as close as possible.

#### Slimline touchscreen remote

Choose from three flame settings, adjust the temperature or use the ambience of flames without heat, all from Escea's latest touchscreen remote.

# LFS800

FREESTANDING HOLOGRAPHIC ELECTRIC FIREPLACE

## LFS800

Inspired by traditional freestanding wood burners, this versatile electric fireplace features a small footprint and minimalist design, ideal for fitting into compact spaces and transforming interiors with its captivating flames.

### FEATURES

#### Unmatched realism in every detail

Crafted to perfection with realism at its core, every element of this fireplace emulates the look, feel and ambience of a traditional wood fire.

#### Holographic Flame Technology

This innovative technology creates the illusion of burning flames and flying sparks coming from the lifelike fuelbed beneath.

#### Complete installation flexibility

No functioning flue, vents or consent is required, providing complete installation flexibility for a seamless addition to your home.

#### Small footprint, big impact

A minimalist design and Zero Clearance rating ensures maximum impact while taking up minimal space.

#### Slimline touchscreen remote

Choose from three flame settings, adjust the temperature or use the ambience of flames without heat, all from Escea's latest touchscreen remote.

#### Your base, your way

Install this fire in three unique ways: choose the console with 'legs' for a complete freestanding solution, place it on an Escea Glass-reinforced concrete plinth, or on your own custom hearth design, see page 27.

For the most up-to-date product information and specifications, visit our website.

# Holographic Flame Technology

Unlike most electric fireplaces, the Escea LE Series is powered by innovative holographic technology to give you the most realistic flame display on the market.

Using high-definition footage of real burning flames, this advanced technology creates the illusion of natural, dynamic flames and sparks coming directly from the lifelike split logs beneath. The result is detailed, depth-filled flames that mimic the nature of a traditional wood fire burning.

## High-definition video display

A top-mounted LCD display screen plays a high-definition video of real flames burning.

## Beam splitter glass reflection

The video projects onto an angled piece of beam splitter glass, which reflects the video onto the fuelbed.

## Realistic flames

The reflection creates the illusion of burning flames and sparks coming from the fuelbed beneath, matched specifically to the log placement.

## Dynamic glowing embers & lifelike logs

Realistic flames are enhanced by a fuelbed of lifelike split logs, complemented by embers that fade in and out, subtly synchronizing with the flame pattern.

# Fireplace Settings

The Escea LE Series gives you effortless control of your fireplace with its slimline touchscreen remote, allowing you to adjust flame and heat output settings from your fingertips.

## Flame level options

Adjust the flame settings with three distinct modes: 'low' for a slow, relaxed flame, 'medium' for a steady burn, or 'high' for a roaring fire effect.

## Heat output settings

On installation, you can set the fireplace's maximum heat output at 1.5 kW, perfect for taking the chill off, or 3 kW when you need that little bit more.

**Default setting is 3 kW, adjustable to 1.5 kW during installation if desired.**

## Flame only mode

Enjoy the ambience of flames on their own, ideal for when heat is not needed.

## Fascia Options

---

LE1000 with Brow Fascia and PFS Hearth

### BROW FASCIA

A three-sided metal fascia designed to frame the fireplace window, creating depth and dimension.

Ideal for pairing with a floating hearth using the Prefabricated Floating Shelf System, see page 25.

---

COMPATIBLE WITH **LE800, LE1000**

---

### BEVELLED FASCIA

A bold bevel-edged fascia that frames the full fireplace opening, for a sophisticated statement frame finish.

---

COMPATIBLE WITH **LE800, LE1000**

---

### LINEAR FASCIA

A slim bevel-edged fascia that frames the fireplace surround, for a subtle, minimalist finish. Ideal for concealing imperfections in the wall lining of the fireplace opening.

Extended Linear Fascia available for Display Niche.

---

COMPATIBLE WITH **LE800, LE1000 + Display Niche**

---

## Accessories Collection

Make your fireplace the focal point with Escea's collection of optional accessories, specifically designed to enhance the LE Series Electric Fireplaces.

From in-wall display niches to plinths, floating hearths, ledges, and a classic mantel surround, these accessories offer a seamless design and installation solution.

### DISPLAY NICHE

Designed to extend the visual width of the fireplace and provide balance when placing a TV above, the Display Niche can be installed either side of the LE800 or LE1000. Choose both for a full wall display (Double Niche), or one for an asymmetrical design feature (Single Niche).

LED top-lighting accentuates depth and display objects, providing a full in-wall solution to complete your fireplace feature wall.

Single Niche - Left

Single Niche - Right

Double Niche

### PREFABRICATED FLOATING SHELVES

Create a contemporary floating ledge above the fireplace, or a floating hearth beneath using the Escea Prefabricated Floating Shelf (PFS) System.

Built into the wall, the engineered system provides the internal framing component of the shelf, cantilevering out to create a floating hearth or ledge. The shelf can sustain loads up to 300kg including your choice of finishing material to be applied on install.

PFS Ledge

PFS 1200 Hearth

PFS 1600 Hearth

#### CLASSIC MANTEL

A traditional mantel surround with infill panels to complement the LE800. Constructed from MDF, the mantel comes with a white undercoat finish, allowing you to complete the look with your choice of paint colour.

#### UNIVERSAL PLINTH

Elevate the LFS800 Freestanding Electric Fireplace with Escea's glass-reinforced concrete plinth – a ready-made base for achieving a premium designer look.
