Whether you're looking to protect a newly installed surface or extend the life of your existing benchtop, Flexi Film™ delivers exceptional protection without compromising style. Experience the perfect blend of innovation and functionality with Flexi Film's stone protection film where safeguarding your surfaces is our top priority.

FLEXI FILM™ - STONE PROTECTION FILM

Protecting natural stone benchtops and hard surfaces with Flexi Film™, is a smart choice for all Homeowners, Hospitality Industry and Commercial Property Managers alike.

Flexi Film's™ stunning, natural finish not only enhances the aesthetics and feel of the stone but most importantly protects and improves the functionality for everyday use, simplifies the cleaning process and prolongs the lifespan of your precious asset.

FLEXI FILM'S™ ATTRIBUTES...

Prevent permanent staining of natural stone Benchtops and hard surfaces, right throughout Residential homes and Commercial Environments with our uniquely developed and advanced, stone protection film, Flexi Film™. The protection and preservation of stone surfaces is enhanced by way of a professional, yet quick installation of our clear, undetectable film which repels stains, is easy to clean and maintains that original and luxurious look of your natural stone benchtops and hard surfaces.

Suitable for all area including

- ☉ Kitchens
- ☉ Living areas
- ☉ Bathrooms
- ☉ Wet areas in Residential or Commercial environments.

Flexi Film's™ versatility...

Flexi Film™ stone protection film also proudly provides protection against scratching and chipping but importantly, can be conveniently removed and replaced professionally at any time, should one decide to change the look from Polished to Honed or vice versa, or in the unlikely event of any damage occurring to the film by way of abnormal use, simply removed and replaced without any damage occurring to the original stone surface, which has been preserved with Flexi Film™.

Why incorporate stone protection into your hard surfaces?

Flexi Film™ is a sleek, smooth and highly durable polymer film, specifically designed and created using advanced technology, to protect porous and sensitive stone surfaces. It can also be used to protect a wide variety of other hard surfaces, such as engineered stone, metals, glass and even timber surfaces. Flexi Film™ delivers a multitude of benefits for your hard surfaces and natural stone which include:

- ☉ Repels everyday stains
- ☉ Protection against harsh chemicals
- ☉ Protection from everyday 'wear and tear', scratching and chipping
- ☉ Enhances the look of the natural stone's detail
- ☉ UV protection - up to 99% UV Inhibitor
- ☉ Heat-resistant - up to 176 degrees
- ☉ Polished or Honed (Gloss or Satin) finish
- ☉ Cost-effective non-liquid stone protection
- ☉ Easily removable, when necessary, without causing damage
- ☉ Fast and non-invasive install - use within two hours
- ☉ Lasts up to 6 - 8 years in a Residential environment
- ☉ Lasts up to 3 - 6 years in a Commercial environment
