

INFINITY ZLX

PREMIUM | EASY SLIDE | WIDE OPENING | CUSTOM MADE
RETRACTABLE SCREEN SYSTEM

A premium retractable screen system with patented technology for sleek and seamless operation, the INFINITY ZLX by Freedom Retractable Screens is an industry leading solution for various door types and sizes. A single screen with standard mesh can span openings between 0.8m to 6.5m. A double screen with standard mesh can expand to a massive 13m, with some configurations up to 3.4m high. The INFINITY ZLX is a stable and highly aesthetic solution for improving air flow and managing insect control. Captured mesh technology creates a durable system, while the patented auto brake feature allows the screen to stop at any position without compromise. Effortlessly easy to slide, the latching system secures the screen in place when in use, or provides a complete clear view when retracted and not in use.

Industry Leading Retro-Fit Experts

INFINITY ZLX | DESIGNED FOR LONGEVITY

Freedom Retractable Screens is the industry leader for retrofit retractable screens on new and existing buildings. Providing style and cutting edge technology, we supply screens to over ten countries throughout Australasia, Europe, North America, and the Middle East.

Our product design team ensure that our screens are created to withstand daily use over many years and meet the aesthetics required for your home. We apply wind tests, static load weight pressure tests, and use high quality materials to manufacture products designed to last.

The INFINITY ZLX low-profile track reduces the risk of trip hazards and the patented brake system avoids spring backs common on other brands. The INFINITY ZLX is easy to operate, slides smoothly across large openings and stores neatly when not in use.
