

HUMAN PAVILION

We're proud to introduce Human Pavilion, the affordable housing initiative by Peter Winkler Architects. In partnership with Australian Architectural Hardwoods (AAH), we're creating cost-effective modular homes using sustainably sourced, recycled timber.

Delivered in a prefabricated kit format for fast on-site assembly, each home is designed with solar passive principles, generous eaves, and spatially efficient floor plans. Customisable to meet individual needs, we also offer planning and building permit support, ensuring a streamlined path from vision to reality.
