

The Water That Changes Everything

Hydrogen Rich Water - pH 9.5

Hydration | Recovery | Performance – All in One Glass

■ What is pH 9.5?

- pH means Potential Hydrogen
- Water with a higher alkalinity than regular tap water
- Helps neutralise acid in your body, keeping your system balanced
- Chosen by athletes and health experts for peak hydration and performance

■ Why Every Household Needs It

- Optimal Hydration: Replenishes your cells faster than regular water
- Alkaline Power: Balances your body's pH for better energy and reduced fatigue
- Antioxidants: Supports muscle recovery and fights free radicals
- Family-Friendly: Safe and refreshing for athletes, adults and kids

■ The Benefits at a Glance

- Hydration – Fast absorption at the cellular level
- Recovery – Post-workout healing and reduced fatigue
- Antioxidants – Neutralises harmful free radicals

■ Our Water Ioniser

- Made in Japan – Precision engineering and quality you can trust
- Used in 300+ hospitals across Asia and beyond for patient hydration
- Produces several pH's at the touch of a button
- Durable, reliable, and designed for everyday use
- Lasts for 25+ years

Global Network

We have branches in 27 countries
servicing over 180 countries
- ask us how to get yours.

Our advanced water technology produces molecular hydrogen - a powerful antioxidant that helps neutralise oxidative stress and support the body's natural recovery.

@hydr8tion_n8tion_

It can also help reduce lactic acid buildup, easing muscle fatigue and improving post-performance recovery.

- Easy self-installation - no plumber needed
- Portable & simple to use
- Perfect for home, gym, or life on the go.

Experience hydrogen-infused hydration.
