DESIGNING YOUR INTERNAL

Our team of experienced designers will work with you to create the perfect wardrobe solution to fit your needs and style. We understand that designing the interior of a wardrobe can be a daunting task, which is why we are here to guide you through the process.

When it comes to designing the interior of your wardrobe, it's important to consider your specific needs and requirements. Here are a few tips to keep in mind:

Assess your clothing and accessory storage needs:

This includes determining how many items need to be hung, folded, and stored in drawers or on shelves. For example, if you have more items that need to be hung, such as suits and dresses, we may recommend adding more hanging space in your wardrobe.

Consider your lifestyle and habits:

For example, if you are a collector of shoes, we may recommend adding more shelves or drawers to store your shoe collection. Similarly, if you have a lot of jewelry, we may recommend adding a jewelry drawer or specialized storage solution.

Take advantage of specialized storage solutions:

Specialized storage solutions such as tie racks, belt racks, and scarf hangers can help keep your accessories organized and easily accessible.

Declutter:

Encourage you to declutter your clothes and accessories before installing the wardrobe, this will make it easier for you to know what you have and what storage solutions you actually need.
