## Not Just a Mirror

A Centrepiece of Modern Living.

## Premium Smart Mirrors for Luxury Homes

LITECON is an Australian smart mirror company based in Melbourne, founded by three partners who share a genuine passion for smart technology and the future of the modern home. We wholesale exclusively to the trade: bathroom showrooms, bathroom suppliers, plumbing suppliers, and bathroom products and tiles resellers. We do not sell to the public.

We believe smart mirrors are the future. As smart technology continues to transform every corner of the home, the bathroom is next. A truly smart mirror isn't just a mirror with a light. It has hardware, electronics, and connectivity. Wi-Fi, Bluetooth, a touch screen, built-in apps, speakers, and adjustable LED lighting. That's what we supply. And we're here to help our trade partners bring that experience to their customers.

## Who We Are

LITECON was founded by three partners who each bring something essential to the business:

- A cabinet maker with precision craftsmanship and an understanding of how products need to fit, install, and last in real-world environments
- A sales professional with commercial expertise and a deep understanding of what trade partners need to succeed
- A home décor expert with a sharp eye for design, aesthetics, and what resonates with end consumers in prestige bathroom spaces

Together, we've built a business that understands both the product and the trade, and we're passionate about what we do.

## What We Supply

Our smart mirrors are purpose-built for the bathroom. Every LITECON mirror functions as a normal mirror and as a fully connected smart device. Our range features:

- Android touch screen with access to built-in apps including social media, YouTube, and more, directly from your mirror
- Adjustable LED lighting with precision CCT LED lighting around the mirror, dimmable and colour-adjustable to suit any bathroom environment
- Built-in speakers delivering high-fidelity audio for music and media
- Bluetooth and Wi-Fi connectivity for seamless wireless connection to devices and networks
- Water resistant IP rated 44 engineered specifically for bathroom environments
- Smart features including defog, timers, weather display, medication reminders, and OTA updates

For full technical specifications email us at [support@liteconau.com](mailto:support@liteconau.com) or apply for a wholesale account.

## Who We Work With

We wholesale exclusively to qualified trade partners across Australia, including:

- Bathroom showrooms and bathroom product resellers
- Plumbing suppliers and merchants
- Bathroom product and tile retailers
- Luxury home builders and residential developers
- Interior designers and architects

We work closely with our showroom partners, from initial setup and product display through to marketing assets, staff familiarisation, and ongoing support. Our goal is to make LITECON a natural, high-performing addition to your showroom floor.

## Our Vision

We believe smart mirrors will eventually be in every home. As the smart home revolution continues, where every appliance, fixture, and surface becomes connected, the bathroom mirror is one of the last frontiers. LITECON exists to lead that shift in Australia, and to give our trade partners the products and support they need to be ahead of it.

## Wholesale and Trade Accounts

LITECON is a wholesale-only business. We do not sell direct to the public. If you're a bathroom showroom, plumbing supplier, or bathroom and tile reseller interested in stocking our smart mirrors, we'd love to hear from you.

Apply for a trade account or reach out directly at [sales@liteconau.com](mailto:sales@liteconau.com). Our team responds within 2 business days. For any urgent enquiries, call us on 1300 877 829 and we can assist you over the phone.

## Aura Series Circle Smart Mirror A1

The Aura Series A1 is Litecon's most elegant circle smart mirror engineered to last with cutting-edge technology, corrosion and water-resistant construction, and a gorgeous surround LED lighting system that elevates any luxury bathroom. The built-in automatic defogging system means you'll never deal with foggy mirrors again.

## Key Features
