UltrasonIQ[™]

Medasyst Mycare UltrasonIQ[™] Technology to create a fine particle size and to fully and safely disperse medications into a 50ml liquid dose.

Some medications are designed to release slowly and should not be liquefied. Always consult your Doctor, Pharmacist or Health Care Professional for advice about your medication type and its suitability for liquefying.

“I take 26 pills a day, of all sorts of shapes and sizes, and any of them can get stuck in my oesophagus causing pain, reflux, choking and breathing issues.

Using Medasyst has dramatically changed this process for the better.”

“I think that this device has potentially saved my life.”

“I don’t have words enough to thank the Medasyst team for making this remarkable technology available.

It is Life changing.”

“I wanted to cry tears of joy and relief that this device will now remove the trauma for me and make taking my medications so much easier.”

Make Medasyst a part of your daily routine.

Managing your hard to swallow solid medications has never been easier than with Medasyst® Mycare. Just imagine *never* having to crush tablets again and all the hard, time consuming effort that it requires.

Medasyst® Mycare easily converts your solid medications* and supplements into an easy to swallow 50ml liquid dose.

Medasyst’s Ultra Clear Daily Disposable Beakers ensure that every user gets their medication and our range of flavoured masking powders means your medications have never tasted so good.

You and Medasyst. Care for your family.

*Some medications are designed to release slowly and should not be liquefied. Always consult your Doctor, Pharmacist or Health Care Professional for advice about your medication type and it’s suitability for liquefying.

Solid pills in the beaker with 50ml of water

The pills are fully dispersed in 50ml of water.
