

ILLUMINATED

ARCHITECTURAL DOORS

Nexus Customs illuminated architectural doors are precision-engineered feature systems that integrate light, material, and form. Designed to elevate entrances, they deliver a seamless, contemporary finish with built-in illumination. Cleaner than timber or MDF, our doors require no painting and are engineered for long-term stability —making them ideal for high-end residential, commercial, and hospitality spaces.

ILLUMINATED

SKIRTING SYSTEMS

Nexus Customs illuminated skirting systems redefine the wall-to-floor junction through subtle, integrated light. Designed as architectural details, they enhance depth and atmosphere while maintaining clean, minimal lines. Manufactured from advanced materials, these systems offer durability and a premium finish without repainting or ongoing maintenance.

ARCHITECTURAL

WALL & PANEL SYSTEMS

Nexus Customs architectural wall and panel systems are integrated interior surfaces designed to add depth, rhythm, and architectural presence. Combining refined materials with lighting potential, they transform walls into intentional design elements. Launching soon for high-end residential, commercial, and hospitality applications.
