MATURE AUSTRALIAN OLIVE TREES  
QUALITY YOU CAN AFFORD

## PRODUCT OF AUSTRALIA

**OLIVE TREES ARE RENOWNED FOR THEIR STRENGTH, RESILIENCE AND LONGEVITY, WITH SOME LIVING FOR THOUSANDS OF YEARS. THEY'RE NOT ONLY PRODUCTIVE FRUIT TREES, BUT ALSO BEAUTIFUL LANDSCAPE FEATURES THAT PROVIDE CHARACTER, STRUCTURE AND WELCOME SHADE.**

As evergreen trees, olives retain their foliage year-round, unlike deciduous trees that lose their leaves in winter.

The Olive Tree Farm has a large selection of healthy, well-established, field-grown olive trees, all approximately 30 years old.

We currently have Leccino oil-variety trees available. Kalamata table-variety trees may also be available by request, although these are priced slightly higher as they are located outside the area we are currently clearing.

These mature trees are an excellent way to add instant beauty, character, shade and Mediterranean appeal to your garden, courtyard or property.

Once removed from the ground and placed in the transport bag, the tree will be approximately 60 cm taller due to the height of the root ball and bag. Trees can be pruned further if required for transport or planting.

### TREE SPECIFICATIONS

**Age:** Approximately 30 years old

**Variety:** Leccino (oil)

**Kalamata:** May be available by request

**Trunk diameter:** 15–27 cm, measured 40 cm above ground level

**Majority of trees:** Approximately 19–21 cm diameter

**Current height:** Approximately 2.5–2.8 metres after pruning

**Original height:** Approximately 5–6 metres before pruning

### REMOVAL & TRANSPORT

Each tree is carefully dug out, removed and bagged ready for transport. We can load the tree directly onto your truck or trailer.

Delivery is also available at an additional cost, depending on the quantity of trees and delivery location.

Due to complex interstate government quarantine requirements, we currently only supply and deliver to customers within Victoria.

### PLANTING REQUIREMENTS

Please note that we do not replant the trees at their new location.

The buyer will need to arrange:

- Site preparation
- Access and positioning
- Placement of the tree
- Staking and securing the tree after planting

These are large, established trees, so suitable access, equipment and preparation are essential.

Bring the beauty and character of a mature olive tree to your property—without waiting decades for it to grow.
