

# Pippinwood Naturals

Nestled near Stanthorpe on the Granite Belt in Queensland, Pippinwood is a family-operated farm dedicated to handcrafting high-quality Natural products from ethically sourced and environmentally friendly ingredients.

Our goat milk products are made from milk sourced directly from our own herd of miniature goats. Botanicals from our own garden, and locally sourced natural ingredients.

We create our products without harmful chemicals, fillers, parabens, or artificial ingredients, making them ideal for those with sensitive skin.

We believe in using only the finest ingredients, so a little of our products goes a long way.
