of pollutants

WHY
PREMIUM
OFFERS THE

ULTIMATE HOME WATER FILTRATION SYSTEM

**HIGH QUALITY
PREMIUM CABINET**

Designed to be safely mounted either to the brickwork of your home or your fence work. Powder coated in a stylish universal light grey, the casing is specifically chosen to assist with any internal heat suppression.

**SUITABLE TREATMENT
FOR RAIN & TOWN WATER**

Designed to remove particle contamination of one micron or greater, along with chemical traces, odour & micro organic bacterial content. Though rain water tanks normally contain a certain amount of dust, grass seeds, pollen and bird faeces... Premium has it all covered.

**100% KILLS BACTERIA
EXTRA LARGE UV LAMP**

Exposure time to your water supply to guarantee this claim is critical. UV lamps generally supplied by our competitors are often up to 40-50% smaller than our model and fall short when eliminating bacteria.
