

# HEMP SLEEP & RELIEF GUMMIES

Our formulation works amazingly due to the synergy and high milligrams of our ingredients. Hemp is both a calmative and an anti-inflammatory, which provides relief from inflammation based discomfort. Our gummies have a natural ingredient that powerfully boosts your serotonin levels; more serotonin in your system promotes a deep, restorative sleep, where you wake up feeling calmer, refreshed and are ready to take on the day. Our gummies have no THC, are vegan and gluten free. **Our gummies are not recommended for those who are pregnant, breastfeeding, have high blood pressure, heart or liver disease, epileptic or Down's syndrome.**

# HEMP CALM & FOCUS GUMMIES

Our Calm and Focus gummies have been created for people who suffer stress and worry during the day. Our synergy of Hemp plus a serotonin booster calms the central nervous system and reduces inflammation. We have included 3 additional ingredients to assist with those struggling with attention deficit and focus. Taurine - the main ingredient in red bull, is an amino acid that assists in brain cognition and function, helping you to feel alert. L-Tyrosine is amazing for helping the brain focus. It's the precursor to dopamine, which helps you feel pleasure, motivation and satisfaction. GABA is thought to play a major role in controlling anxiety, stress and fear.

Take 1-2 gummies per day. Our sleep and calm gummies have been designed to take together.
