

PREMIUM WATER FILTRATION

# Cleaner water. Properly installed.

Two engineered filtration systems for Australian homes, fitted by licensed plumbers and backed by a 5-year warranty. From whole-house protection to drinking-water perfection at the kitchen tap.

- ✓ Whole house and under-sink RO
- ✓ 99.9% contaminant reduction
- ✓ Fitted by licensed plumbers
- ✓ 5-year system warranty

99.9% CONTAMINANT REDUCTION

# What's actually in your tap water.

Our 7-Stage RO system reduces 99.9% of common tap water contaminants, including fluoride. Here's what gets removed before it reaches your glass.

## Cl<sub>2</sub> Chlorine

A chemical disinfectant added to tap water to kill harmful microorganisms like bacteria, viruses and parasites.

- Dries out skin and hair
- Affects taste and smell
- Forms byproducts like THMs that some prefer to reduce

## NH<sub>2</sub>Cl Chloramine

A bi-product of chlorine and ammonia used for further mains disinfection. Doesn't evaporate like chlorine and is harder to remove with basic filters.

Needs catalytic carbon, which is why our Whole House system has a dedicated chloramine reduction filter at Stage 3.

## PFAS PFAS

Synthetic "forever chemicals" used in non-stick cookware, waterproof fabrics, food packaging and firefighting foam. Don't break down in the body or environment.

- Hormonal disruption
- Raised cholesterol
- Reduced immune response

## MP Microplastics

Plastic fragments smaller than 5mm, shed from synthetic clothing, packaging and road wear. Found in tap water, bottled water and human blood.

- Carry chemicals and bacteria
- Inflammation in gut and airways
- Long-term build-up in tissue

## Pb Heavy Metals

Lead, copper and mercury entering water through old pipes, soldered joints and industrial run-off. Even low levels build up over years.

- Brain development in children
- Kidney and nervous system damage
- Tissue accumulation over decades

## Hp Herbicides & Pesticides

Agricultural and garden chemicals that wash into rivers, dams and groundwater, the same sources our drinking water is drawn from.

- Hormonal disruption
- Nervous system effects
- Long-term cancer risk (still being studied)

# Filtered water at every tap.

A 20-inch triple-stage system that protects every shower, tap, and appliance in your home. Bigger filters, longer service life, and a final 0.5-micron stage that's ten times finer than standard 5-micron filters.

1

### Polyspun Sediment

5 Micron · Three-layer gradient

Removes sediment, rust, sand, silt and algae before they reach the carbon stages.

**5μ**  
MICRON

2

### Carbon Block

20 Micron · Low-pressure-drop, WQA tested

Over 95% reduction of VOCs. Removes chlorine, heavy metals, herbicides, pesticides, plus tastes and odours.

**20μ**  
MICRON

3

### Chloramines Reduction

0.5 Micron · Composite carbon block

Final stage. Targets chloramines, VOCs and DBPs that single-stage systems leave behind.

**0.5μ**  
MICRON

#### Softer skin & hair

Less chlorine on your shower

#### Every tap protected

Kitchen, laundry, bathrooms

#### Up to 18 months

Filter life per service

#### 5-year warranty

System-wide cover

THE ORIGINAL 7-STAGE

# Seven stages, one perfect glass.

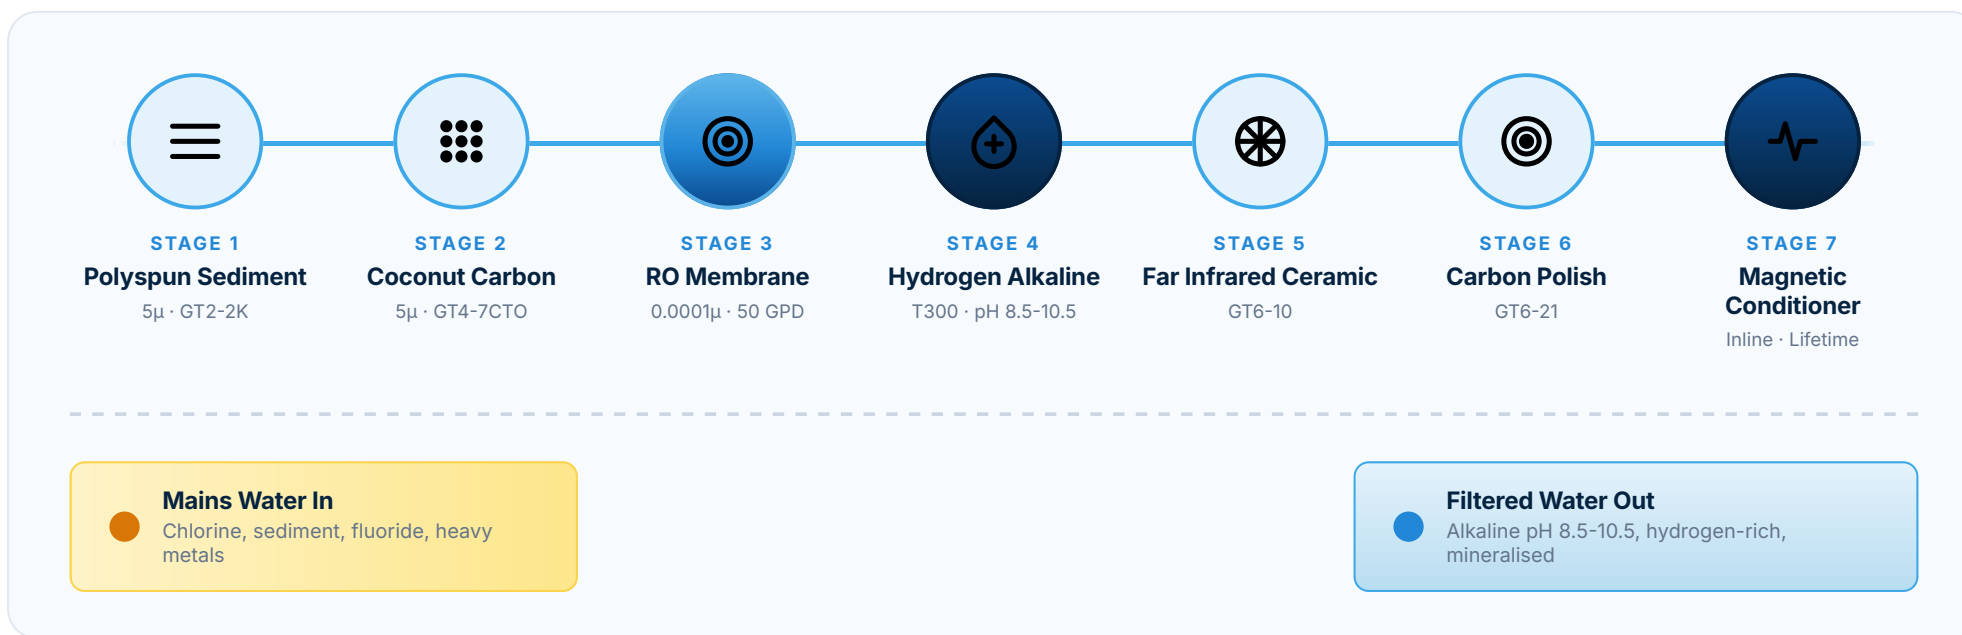

Reverse osmosis with mineral remineralisation and natural alkalinity. Clean drinking water from a dedicated kitchen tap, with hydrogen-rich alkaline pH between 8.5 and 10.5 retained for the full 12-month filter life.

FULLY INSTALLED

# \$1,100

## Hydrogen-rich alkaline

Sub-nanometer minerals containing magnesium and potassium hold pH between 8.5 and 10.5 for 12 months.

## 99.9% reduction

Removes heavy metals, fluoride, chlorine, microplastics, PFAS and dissolved solids at molecular level.

## Dedicated kitchen tap

Drinking water at a separate tap. The mixer comes in matte black, brushed gold and chrome finishes.

## Lifetime conditioner

The Stage 7 magnetic conditioner has no replacement cost. It conditions water structure permanently.

WHY SELECT FILTRATION

# Run by licensed plumbers. Backed in writing.

THE PEOPLE BEHIND IT

## Yaz & Luke

Select Filtration is run by Yaz and Luke, a husband-and-wife team of licensed plumbers based in Melbourne. After more than a decade installing filtration in Australian homes, they saw too many systems that were poorly built, badly installed, and never serviced.

Select Filtration is their answer. Every system fitted by a licensed plumber. Five years of system warranty. Service intervals tracked for you.

The same family runs every job. The same family answers the phone.
