sentra tech

By future-proofing the building's backbone with fiber, the possibilities are endless. A high-speed internal network allows for customised options during the initial build stage and future add-ons. Options include:

Base Building:

Building "Backbone"
Multi-Residential Integration Module
Fiber Link Backbone (Network)
Intercom
Secure Entry Points
MATV & Data
CCTV
Remote Access Control

WiFi

Robust, reliable WiFi network for all residents to enjoy.

Entertainment Control:

Home theatre
Media room and TVs
Multiroom audio
Outdoor audio
Music streaming
Touchscreen system control
Voice Control

Environment Control:

Cooling and heating control
Automated blinds
Automated fans
Programmable light switches
Single interface to control all

✓ **Unified Platform**
✓ **Future-Proofed**
✓ **Project-Wide**
✓ **Robust**
✓ **Scalable**

Luxury Living, Smart & Secure

At Sentra Tech we deliver a project-wide, scalable system that provides builders and home owners peace of mind. A unified control platform specifically built for Multi-Residential dwellings delivers more efficient operations to builders and property managers.

Using an industry-leading, fully customisable and scalable Smart Home solution enables developers to offer prospective home buyers an array of selections that can further enhance their new home. With our team's long standing combined industry knowledge and experience integrating common building automation with smart home technology, we provide residents with superior security and convenience as well as a personalised smart home experience.

Our tech support network serviced 24/7 via cloud and locally by your friendly team at Sentra Tech, means you can be confident in knowing that your system is robust and any issues that arise can be resolved quickly and often remotely by our tech support team.
