ABOUT SMART UPGRADES

Smart Upgrades helps Victorian homeowners transition to smarter, energy-efficient homes.

We provide expert advice, premium products and professional installation, making it simple to upgrade your home while accessing available government rebates.

OUR MISSION

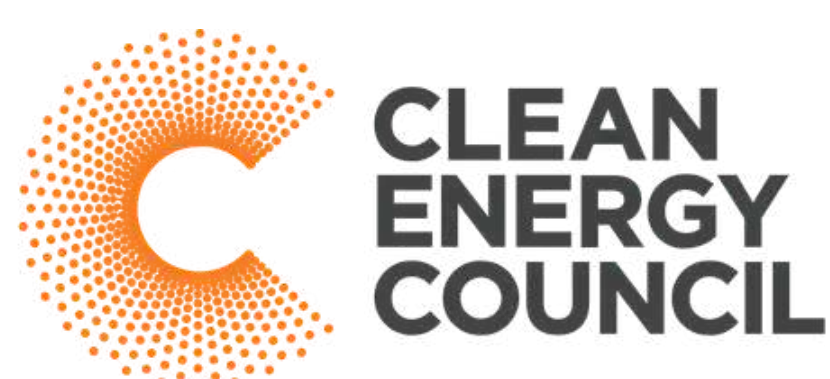

To create more comfortable, energy-efficient homes through trusted advice, quality products and professional installation that deliver lasting value.

OUR CAPABILITIES

- We specialise in one thing: replacing old ducted gas heating with high-efficiency reverse cycle air conditioning, ducted or multi-split, sized to your home rather than sold off a price list.
- It starts with a free home check. We look at your system, your home and how you use it, then confirm what the Victorian Energy Upgrades program is worth on your job. Your quote is fixed price, every item listed, with the rebate shown as a deduction. We do the VEU paperwork, so there is nothing to claim back later.
- Our own licensed Melbourne technicians install it, usually in a day. We arrive inside a two-hour window, protect your floors, take the old system away, and nothing outside the quote happens without your approval.
- You are then covered by a 7-year manufacturer product warranty and our 5-year workmanship warranty.

**LICENSED, ACCREDITED,
MELBOURNE-BASED**

WHY UPGRADE?

Switch from old ducted gas heating to a modern, energy-efficient reverse cycle air conditioning system.

- ✗ High energy bills
- ✗ Only provides heating (no cooling)
- ✗ Aging technology
- ✗ Low carbon & cost efficiency
- ✗ Higher carbon emissions

- ✓ Heating and cooling in one system
- ✓ Lower energy bills
- ✓ Energy efficient technology
- ✓ Improved comfort all year
- ✓ Better for the environment

UPGRADE TO A SMARTER, MORE EFFICIENT HOME

The **Victorian Energy Upgrades (VEU) program** can help eligible households make their homes more energy efficient through a range of smart upgrade solutions.

With **Smart Upgrades**, making your home more energy efficient is simple. We assess your home's energy needs, recommend solutions suited to your lifestyle and help you make the most of available VEU incentives.

From everyday efficiency to smarter energy solutions, we're here to help you create a more comfortable, efficient and sustainable home.

*Eligibility criteria apply. Our team will guide you through the process.

OUR SIMPLE 4-STEP PROCESS

01

REQUEST YOUR FREE CHECK

Fill out our simple form to schedule a complimentary, no-obligation home energy assessment tailored to your needs.

02

RECEIVE YOUR CUSTOM QUOTE

Our experts assess your home and prepare a detailed quote, including sizing and VEU rebate.

03

PROFESSIONAL INSTALLATION

Certified technicians install your chosen energy-efficient solutions with minimal disruption, at the highest quality standards.

04

ENJOY LASTING SAVINGS

Start saving on energy bills, reduce emissions, increase comfort and improve the value of your home.

Trusted Premium Brands

Why Homeowners Choose Smart Upgrades

Unlike many installers who simply sell an air conditioner, Smart Upgrades delivers a complete home comfort solution. From helping you access valuable government rebates to recommending the ideal system and providing professional installation, every step is designed to make your upgrade simple, transparent, and stress-free.

Whether you're replacing an old ducted gas heater or improving your home's energy efficiency, our experienced team is committed to delivering quality workmanship, honest advice, and long-term value.

"We're not just installing an air conditioner. We're helping Victorian families create more comfortable, energy-efficient homes while making government rebates easy to access."
