

ONCE YOU SEE THE DIFFERENCES, YOU CAN'T UNSEE THEM

AND NEITHER CAN YOUR CLIENTS OR COMPETITORS.

If you're the kind of landscape professional who likes your design work to stand out for the right reasons, take a closer look at Straightcurve today. Compare our range to what you're currently using (or any other modular steel edging) and you'll quickly appreciate the differences.

Differences such as:

- ✓ The notched design that allows you to hand-shape beautiful curves.
- ✓ The absence of ugly screws at the seemingly seamless joins.
- ✓ The engineering that means you're not burying material you've paid for.

If you came to the show looking for new ideas, materials, or solutions, be sure to check out the Straightcurve stand. Although we're not a new company (we celebrated our 10th Anniversary this year), we might be new to you, so compare our products side-by-side with the alternatives. Look closely at the design, usability, engineering details, and the installation process. You'll see the quality, thought, testing, and practical insight that's gone into every single Straightcurve solution. **You'll see why professionals who try us rarely look back. And you might see that it's time to give us a try.**

ClickConnect™

FOR PROFESSIONALS

Introducing **ClickConnect™** - The world's fastest garden edging system that connects & installs in seconds without tek screws or power tools. Simply slide, click, spike, and move on!

The fastest edging system, proven to be 50 percent quicker.

Spike design prevents bending in hard or compacted soil.

Weather-protected packaging keeps products in top condition.

Detailed installation videos make training quick and easy.

Simple to order, collect, and install, even for beginners.

Everything is included with no extra trips or missing parts.

Heat-resistant box keeps steel cool in the sun.

Requires only a mallet and spade, no extra tools needed.

Heavy-duty stainless steel fittings ensure durability.

Symmetric design allows for tight, even curves for Flex range.

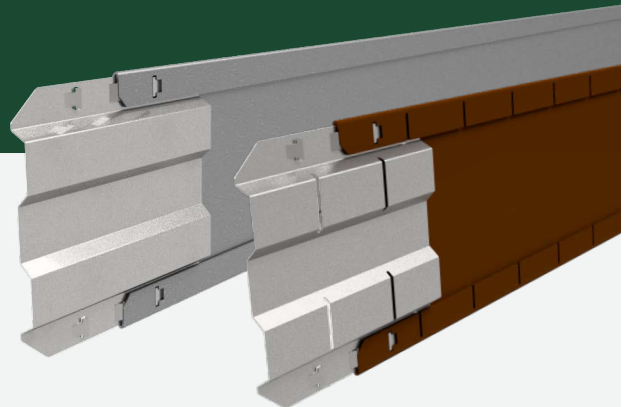

Custom corners can be made in seconds.

Strong and long-lasting connections.

What's New?

- ✓ Notch spacing for Flex range is reduced to allow for smoother curves.
- ✓ Patented ClickConnect™ connector plate (screwless connection, no more screwing or aligning holes).
- ✓ Top and bottom symmetrical (no top/bottom or left/right).
- ✓ Smooth front, no more visible screws or pop-rivets or both.
- ✓ The new symmetrical form allows bending corners by hand without scoring a line or cutting.
- ✓ Slightly shorter lengths for easier transport.
- ✓ All products in sets packed in a box, so everything you need for installation is in one place.
