The art of
light and shade

Unveiling
the beauty
of outdoor
spaces with
Vergola®.

Discover the transformative features of Vergola®

Vergola breathes life into outdoor spaces through its mastery of light and shade. As the original open-close louvre roof system, Vergola continues to redefine the boundaries between indoor and outdoor living. The filtered sunlight and delicate effects of shade add a touch of magic to create the perfect ambiance for your home.

Adjustable louvres

Create the perfect balance of light and shade

Vergola's adjustable louvres are the secret to creating a fabulous atmosphere. Choose to enjoy full sun, full shade, or the delicate effects of filtered sunlight or shade.

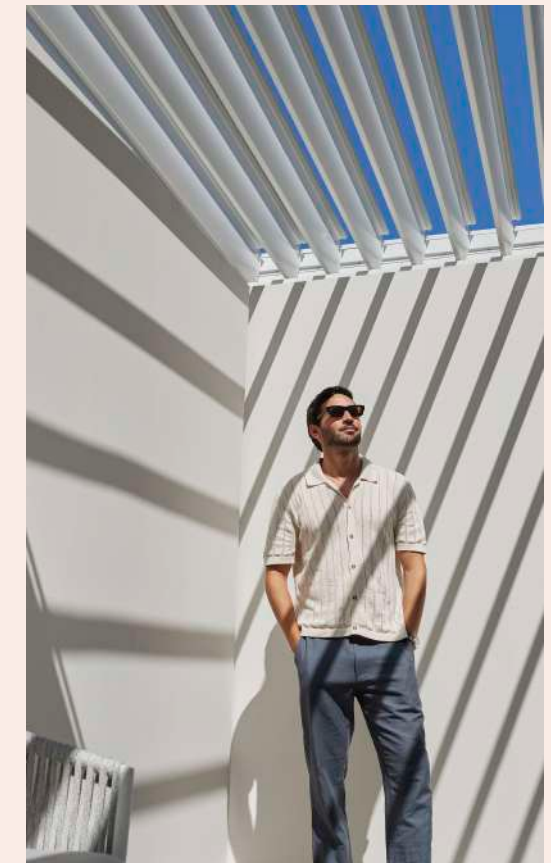

Innovative and award-winning louvre design

Delivers superior insulation capabilities

A standout feature of the original Vergola is its distinctive and award winning double-skin aerofoil-shaped louvre that forms an insulating air-gap to reduce heat radiation.

Make the most of your outdoor spaces

High quality materials No room for compromise

To ensure the longevity and durability of our louvre roofing systems Vergola uses Australian made BlueScope® COLORBOND®.

Framework and guttering The foundations for creativity

Specially designed gutters are integrated along the inner perimeter of the Vergola framework, ensuring watertightness and effective runoff into downpipes.

Remote and mobile control convenience Empowering you

Vergola's remote control and smartphone app empowers you to personalise your outdoor experience.

Rain sensor For peace of mind

Designed to automatically close the louvres at the onset of rain, the rain sensor provides reliable weather protection for your outdoor space.

From vision
to reality,
the canvas
is yours.

Elevate your outdoor space to
create your own masterpiece

“The secret to creating a fabulous atmosphere is my Vergola open and close louvre roof system.

With just a touch, I control the light and shade, creating the perfect ambiance.

The filtered sunlight adds a touch of magic, while the delicate effects of shade set the stage for unforgettable moments.”

Let Vergola elevate your outdoor space to create your own masterpiece.

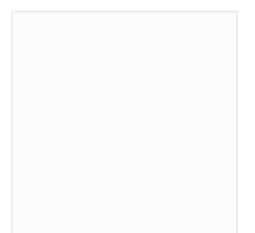

Discover your ideal
colour palette

Be inspired with the infinite colour possibilities

Your Vergola Design Consultant will assist you in selecting the ideal Vergola colour to complement both your outdoor and indoor living areas. Choose from our standard colour range or match a custom colour to suit your aesthetic.

Experience our efficient construction process

Your convenience is our priority. A Project Manager will be appointed as your exclusive point of contact throughout the manufacturing and installation of your Vergola, ensuring you're informed about the construction progress at every stage.

Design & Plan Preparation

A Vergola Design Consultant will visit your home to discuss your requirements, draft initial plans for your review, and seek final approval.

Council/Planning Approvals

Obtaining council approval for your Vergola can be complex and time-consuming. We offer a comprehensive service to handle council liaison and approvals on your behalf.

Building Specifications & Check Measure

After agreeing on the design and approving the plans, our technical team will return to your home and meticulously check measurements to ensure accuracy.

Manufacture of Components

Our skilled tradespeople will manufacture the custom made components of your Vergola at our factory in Terrey Hills, situated on the Northern Beaches of Sydney.

Stage 1 Construction – Frame

Our construction team will expertly construct the frame for your Vergola, providing a solid foundation for the installation of louvres.

Stage 2 Construction – Louvres & Controls

The louvres and controls will be installed at your home and undergo rigorous testing. Your new Vergola will then be ready for immediate enjoyment, ensuring your outdoor space is transformed into a space you will love.
