Wide Span Sheds are made using Australian steel from BlueScope—one of the country’s most trusted manufacturers. Our buildings are clad in genuine COLORBOND® steel, tested by BlueScope for over 50 years in some of Australia’s harshest conditions. Backed by industry-leading warranties, this combination delivers durability, low maintenance, and a finish that looks great and will deliver outstanding, long life performance.

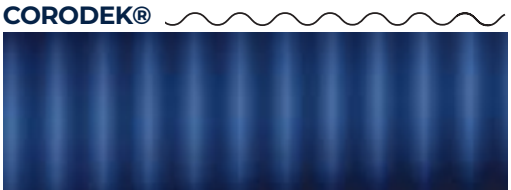

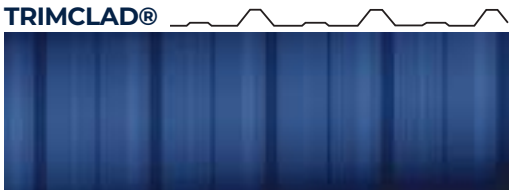

If there aren't 22 colours, it's not COLORBOND®.

For NRL star Latrell Mitchell, the farm is his escape from the game – and his Wide Span Sheds country barn is designed to suit the lifestyle.

Used to store his tractor and essential equipment, the structure features COLORBOND® steel, Monument® walls and COLORBOND® steel Bluegum® roofing, two roller doors, a PA door and roof insulation.

# INDUSTRIAL & COMMERCIAL BUILDINGS

## BUILDING APPLICATIONS

Our range of buildings are suitable for use as workshops, warehouses, factories, offices, depots, recreational facilities and more. Our flexible design software means other purpose-specific requirements can be incorporated into any design quickly and economically.

## NCC BUILDING CLASSES

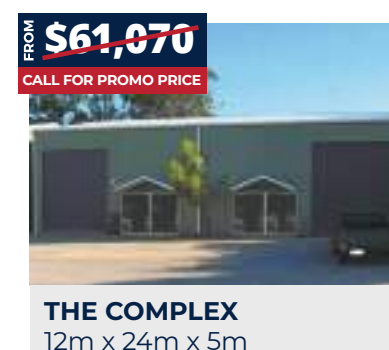

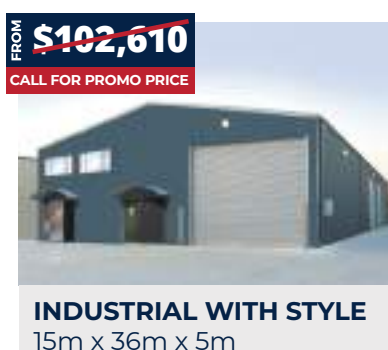

Wide Span Industrial supplies buildings designed to meet the requirements of the National Construction Code Classes 5-9:

- Class 9: Public buildings like assemblies or health care buildings
- Class 8: Buildings for production and other processes carried out for trade, sale or gain
- Class 7: Storage buildings or buildings for the sale of goods by wholesale
- Class 6: Shop or other building for the sale of goods by retail
- Class 5: Office buildings for commercial purposes excluding Class 6, 7, 8 or 9

## PRE-ENGINEERING ADVANTAGES

It is no surprise that pre-engineered steel buildings are very popular due to their many end-user advantages:

- Low up-front investment
- Significantly faster construction times
- Lower maintenance costs
- Large, economical clear spans
- Flexible choice of layouts
- Strength and resistance to earthquakes

# LIVEABLE SHEDS

## The Benefits of Portal Frame Living

Strong, spacious, and versatile — portal frame living offers the freedom and flexibility of layout within the confines of a shed structure. These Class 1a liveable sheds are one of the fastest growing trends in housing alternatives, engineered to meet the standards for permanent residential use. With wide open spans and minimal internal supports, you'll enjoy greater freedom to customise floor plans to suit your lifestyle.

Portal frame buildings are different to stud frame buildings. If in doubt, ask one of our sales team to explain the difference and benefits to help you choose the best building for you.

### BUSH LIVING Portal Frame

51.2m<sup>2</sup> (16m x 3.2m) FROM \$27,070

### HOME SWEET HOME Portal Frame

61.2m<sup>2</sup> (17m x 3.6m) FROM \$34,730

**Wide Span Sheds**  
No Compromise Steel Building Solutions

# SUPERIOR ENGINEERING

At Wide Span Sheds we are committed to providing you with a premium, yet affordable, steel kit building solution. Years of research and development have gone into developing a robust framing system that offers superior protection, along with immense flexibility in design.

## A Haunch Bracket

Our unique haunch bracket design strengthens the rafter-over-column haunch joint and prevents axial torque (twisting).

## B Purlins & Girts

Top hats or fully bolted Z purlins and girts with extra strength from larger overlaps (10% of bay width plus an extra 100mm).

## C Apex Bracket

Apex bracket to the full depth of the rafter 'C' section with full width return to the upper flanges and strengthening features to the bottom of the bracket.

## D Apex Brace

In larger buildings, an Apex Brace is added which aids greatly in maintaining structural integrity.

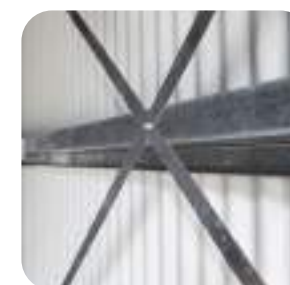

## E Knee Brace

In larger buildings, a knee brace is provided to strengthen the haunch connection, column and rafter.

## F Cross Bracing

Cross bracing to the roof and walls is used to provide additional stability to the building. Available in steel strap or cable.

## G Fly Bracing

Fly bracing to prevent the column or rafter from twisting or rotating under load.

## H Fixing Method

A number of fixing methods are available based on client preferences and engineering requirements.

THE OUTBACK OASIS

50m<sup>2</sup> (8.2m x 6.2m)  
60m<sup>2</sup> (9.6m x 5.2m)  
FROM \$25,800  
FROM \$29,000

DESIGNED FOR THE OWNER BUILDER.

We pride ourselves on providing easy to build steel kit homes at an affordable price.

Wide Span Homes offer a range of quality steel home kits at competitive prices. Supplied in kit form for the owner builder or project manager, we supply both the BlueScope steel components and blueprint for your new home. Fit out to your taste and budget.

The professional builder provides a built service; When a professional builder sources and supplies the building products on your behalf, then a builder's margin is added for the procurement. Eliminating these margins is one way that you can save money.

OWNER BUILDER BENEFITS

- Standard TRUCORE® steel frame, COLORBOND® steel wall cladding and ZINCALUME® steel roofing.
- Steel is extremely durable and well suited to extreme climates.
- Cold-formed steel is as durable as it is light, reducing transport costs.
