CREATE YOUR STORY

Revolutionalising Australia's portrait industry YOU STUDIO PHOTOGRAPHY is a new contemporary studio specialising in creative yet natural photography. Each photographic session is a unique and personal experience designed to bring out the best in you. We encourage you to bring musical instruments, sports equipment, favourite toys, outfits - anything that defines your personality! Afterwards, our creative team will help transform your professional photography into inspiring artistic portraits to be displayed in your home and shared with your family and friends.

YOU STUDIO PHOTOGRAPHY

FIVE KEY POINTS

1. **State of the art studio lighting** This allows for controlled yet versatile lighting conditions giving your photographs that professional edge often seen in creative magazines. Indoor portrait studio lighting also alleviates any concerns over uncontrollable and poor weatherconditions giving you peace of mind that all your photographs will turn out great.

2. **Large photo studio** rooms to accommodate your family pets, props and accessories such as musical instruments, surf boards, favourite toys - which can add a real WOW! factor to your photos. A large photo shoot room gives people the freedom to move, jump and dance so that photographers can capture inspiring movements and expressions in your photographs.

3. **Professional retouchers** who have the technical skills to enhance your photographs whilst still making them look natural.

4. **A diverse and high quality product range** to choose from including frames, canvas and perspex.

5. **Graphic designers** in-house to turn your photographs into inspiring portraits for your home providing a more vibrant and positive atmosphere to live in.
